

**RNA Horizons 2024**  
**Therapeutics Symposium**  
Unlocking the RNA's Potential in Medicine

September 25-27, 2024  
Alfandega Congress Centre, Porto, Portugal

**Erez Levanon** is a Professor of Genomics and Computational Biology at Bar-Ilan University, Israel. His field of research is mainly focused on genomic plasticity, especially A-to-I RNA editing. He earned his Ph.D. with distinction from Tel-Aviv University in 2006 after graduating from the Adi Lautman Interdisciplinary Program for Outstanding Students. Between 2006 and 2009, he served as a Postdoctoral Research Fellow at the Genetics Department of Harvard Medical School under the guidance of George Church. In 2009, he founded his own genomic lab at Bar-Ilan University. Levanon has authored more than 100 manuscripts on his research and has been awarded several prizes for his work.
