

Emanuele Buratti is Scientific coordinator of ICGEB, Group Leader of the Molecular Pathology lab, and contracted professor at the University of Trieste, Italy. He studied Biology at the University of Trieste from 1984 to 1989 to obtain a Biology M.sc. degree and in 1993 he obtained a PhD in Biochemistry. Since more than 20 years, his principal area of expertise has been to study the role played by alterations in RNA metabolism in human disease. In 2001, he identified nuclear protein TDP-43 as a potential pre-mRNA splicing regulator. Recent research has been primarily focused at investigating the role played by this protein in ALS/FTD, Niemann-Pick C (NPC), and Inclusion Body Myositis (IBM). Emanuele Buratti is a member of the Editorial Board at Journal of Biological Chemistry (JBC), President of the Scientific Committee of the Italian FTD Patient association (AIMFT) and was Chairperson for Research Foundation Flanders (FWO).
