

**Bio: Massimiliano Clamer, Ph.D.**, is a C-level executive at Technicon Spa, serving concurrently as the CEO of Immagina Biotechnology s.r.l and its US subsidiary (Immagina Inc). With a profound passion for transforming scientific discovery into tangible solutions, he has built a distinguished career at the intersection of academia and the life sciences industry. Dr. Clamer's academic journey began with a strong foundation in biomolecular science and pharmaceuticals from the University of Padua and the University of Bonn (DE). He went on to earn his Ph.D. through a groundbreaking collaboration between the University of Trento and the University of Oxford (UK), where his research focused on the intricate mechanics of host-pathogen interactions and single-molecule RNA sensing. During his time at Oxford, he strategically complemented his scientific expertise with business courses at the Saïd Business School. Upon his return to Italy, Dr. Clamer leveraged his diverse expertise across three prominent research institutions—the Institute of Biophysics (CNR), the University of Trento, and the Bruno Kessler Foundation—to validate and develop promising business concepts. This culminated in the founding of Immagina Biotechnology in 2014, a company at the forefront of advancing RNA drug development and RNA processing technologies. As CEO, Dr. Clamer has successfully led Immagina Biotechnology to become a key player in the biotech landscape, a position further solidified by its integration into the Technicon Spa holding in 2023. His leadership is characterized by a collaborative spirit, fostering strong relationships with his team, advisors, and investors to bridge the gap between pioneering research and commercial success.
